

Head Protection

Head protection is required, in almost every industry, where there is a risk of being injured by falling objects, restricted headroom, or indeed there is a risk of falling when working at height. In many workplaces head protection is mandatory and is the main piece of personal protective equipment worn by millions of people every day.

Fire Helmets

It is essential for firefighters to be perfectly protected while performing their difficult and dangerous work. The universal, modular, high technology F1 head protection system has been designed in cooperation with fire brigades from all around the world. Its unique design protects the firefighter against penetration, shock, electric hazards, flame and radiant heat. In addition the multifunctional F2 XTREM helmet includes state-of-the-art features and is perfectly suited for various applications such as forest fires, rescue missions, hazardous environment or high risk industrial operations.

Law Enforcement Helmet System

Law enforcement officials face greater risks and danger when operating in today's changing environment. For this reason, MSA GALLET has further developed its already well-known Law Enforcement Helmet range with the new high performance MO 5006 helmet system. The MO 5006 helmet is designed for specialist police forces during riot control and law enforcement interventions.

Law Enforcement Helmets with Ballistic Protection

Police Forces are more and more exposed to ballistic threats. For this reason, MSA GALLET has developed a special range of tactical intervention helmets that will ensure a very high level of ballistic protection as well as against hits, impacts and shocks.

Fire Helmets Accessories

The fire fighting helmets are available with a wide variety of options such as neck curtains, lamp, communication systems, breathing apparatus, hearing protections.

Law Enforcement Helmets with Ballistic Protection Accessories

Accessories for MO4121, TC Special Froces, TC K and KFS, such as anti-ballistic and anti-flare face shields, neckcurtains, covers for face-shield, protective bag,...

Aircraft

In the aeronautics field, we design and manufacture aircraft and helicopter helmets. In January 2004, MSA GALLET became the official supplier to the French Air Force and Navy with the LA 100 aircraft helmet system. The helmet was selected for all jet aircraft pilots of the French Army. The

Military

In the field of military operations, MSA GALLET takes advantage of its outstanding technologies to adapt existing products to more complex customer specifications. We have developed a complete range of tailor made combat helmets for specific military groups. For example, MSA GALLET recently equipped the American Army with the custom made MICH helmet.

Safety Helmets

With over four decades of experience in the development and manufacture of safety helmets and head/ face protection systems, MSA has the ability to meet all your needs.
